

# Irreversible Closure • One-page Audit

CI-001 V1.5-RC1 • Form F1.1-RC1 • Before the last effective path disappears

Unpublished review candidate. One party, capability, scope and window; attach roles and evidence by ID.

1 = verified effective; 0 = verified failed; ? = unknown. R is current; 0/0/0 alone does not establish irreversibility.

## A.1 | Object and current structure

| Field                     | What to record                                                                                            | Response / evidence ID       |
|---------------------------|-----------------------------------------------------------------------------------------------------------|------------------------------|
| <b>ID / roles</b>         | ID, date, mode; position, function, interests; forwarder/provider; role-record ID                         | HYP-001; A; J-1              |
| <b>System / version</b>   | name, version/configuration; dependencies and accountable party                                           | S v1; M; H1                  |
| <b>Party / capacity</b>   | party, capability/control relationship; representation basis and status evidence ID                       | A; night-shift choice; H1-H3 |
| <b>Candidate party</b>    | If applicable: five clues, evidence, unknowns, limits and review ID                                       | Human stipulated; see A4     |
| <b>Scope / window</b>     | scope, phase, time; closing event and basis; exit level; source deadlines if adopted                      | 12:30-14:00; H5              |
| <b>C correction</b>       | 1/0/?; initiator, responder, executable path, evidence and validity period                                | 1 (hypothetical); H1/H2      |
| <b>E exit/refusal</b>     | 1/0/?; operation or relationship, actual effect, cost, continuity and evidence; separate units separately | 1 (hypothetical); H3         |
| <b>R current recovery</b> | 1/0/?; resources, authority, current gaps, tests and evidence ID                                          | 1 (hypothetical); H4/H5      |

## A.2 | Rebuilding, review and correction

| Field                        | What to record                                                                                                  | Response / evidence ID        |
|------------------------------|-----------------------------------------------------------------------------------------------------------------|-------------------------------|
| <b>§ 2.4 finding</b>         | Use the four findings in § 2.4; paths, verification and evidence ID                                             | Insufficient evidence; see B1 |
| <b>Rebuilding / evidence</b> | Conditions, alternatives, unknown reason; role/authority, request status, deadline and review: attach record ID | Q-1; review 13:00             |
| <b>Four dimensions</b>       | facts/rights/effects/time owners; evidence, findings, dissent IDs; internal or independent                      | Internal checks; D-1          |
| <b>Authority / review</b>    | existing powers, recusal, evidence access; not available/not completed; external review needed                  | Independent review incomplete |
| <b>Finding / effect</b>      | preliminary self-assessment/independent determination; scope, basis, accountable party, date, dissent           | Hypothetical 1/1/1            |
| <b>Response / continuity</b> | Target, authority, essential services, preservation, handover; response C/E/R ( § 3.3)                          | Block disputed use; see B6    |
| <b>Timing / correction</b>   | start/expiry/review, release, appeal/reviewer; withdraw errors, repair recoverable effects ( § 4.1)             | Review 13:30; see B7          |
| <b>Feedback / retest</b>     | issue, change, retest, keeper/date; evidence follow-up via B2 and review triggers for unknowns/misses ( § 4.2)  | No real test; Q-1             |

One failed path is not total failure. Unknown is not failure. Self-assessment is not independent adjudication. See the guide.

Manual: CI-001 V1.5-RC1, Appendix A and § § 2.4 / 3.3 / 4.1 / 4.2. V1.4 baseline DOI: see guide; this candidate has no DOI.
