

# Irreversible Closure • One-page Audit

CI-001 V1.5-RC1 • Form F1.1-RC1 • Before the last effective path disappears

Unpublished review candidate. One party, capability, scope and window; attach roles and evidence by ID.

1 = verified effective; 0 = verified failed; ? = unknown. R is current; 0/0/0 alone does not establish irreversibility.

## A.1 | Object and current structure

| Field              | What to record                                                                                            | Response / evidence ID |
|--------------------|-----------------------------------------------------------------------------------------------------------|------------------------|
| ID / roles         | ID, date, mode; position, function, interests; forwarder/provider; role-record ID                         |                        |
| System / version   | name, version/configuration; dependencies and accountable party                                           |                        |
| Party / capacity   | party, capability/control relationship; representation basis and status evidence ID                       |                        |
| Candidate party    | If applicable: five clues, evidence, unknowns, limits and review ID                                       |                        |
| Scope / window     | scope, phase, time; closing event and basis; exit level; source deadlines if adopted                      |                        |
| C correction       | 1/0/?; initiator, responder, executable path, evidence and validity period                                |                        |
| E exit/refusal     | 1/0/?; operation or relationship, actual effect, cost, continuity and evidence; separate units separately |                        |
| R current recovery | 1/0/?; resources, authority, current gaps, tests and evidence ID                                          |                        |

## A.2 | Rebuilding, review and correction

| Field                 | What to record                                                                                                  | Response / evidence ID |
|-----------------------|-----------------------------------------------------------------------------------------------------------------|------------------------|
| § 2.4 finding         | Use the four findings in § 2.4; paths, verification and evidence ID                                             |                        |
| Rebuilding / evidence | Conditions, alternatives, unknown reason; role/authority, request status, deadline and review: attach record ID |                        |
| Four dimensions       | facts/rights/effects/time owners; evidence, findings, dissent IDs; internal or independent                      |                        |
| Authority / review    | existing powers, recusal, evidence access; not available/not completed; external review needed                  |                        |
| Finding / effect      | preliminary self-assessment/independent determination; scope, basis, accountable party, date, dissent           |                        |
| Response / continuity | Target, authority, essential services, preservation, handover; response C/E/R ( § 3.3)                          |                        |
| Timing / correction   | start/expiry/review, release, appeal/reviewer; withdraw errors, repair recoverable effects ( § 4.1)             |                        |
| Feedback / retest     | issue, change, retest, keeper/date; evidence follow-up via B2 and review triggers for unknowns/misses ( § 4.2)  |                        |

One failed path is not total failure. Unknown is not failure. Self-assessment is not independent adjudication. See the guide.

Manual: CI-001 V1.5-RC1, Appendix A and § § 2.4 / 3.3 / 4.1 / 4.2. V1.4 baseline DOI: see guide; this candidate has no DOI.
